## SUMMARY

Computer Science and Engineering graduate with hands-on experience in frontend development, cybersecurity, AI And ML. Skilled in Python, Linux, SQL and Modern Web Technologies. Strong analytical and problem-solving abilities , Adept at working in agile environments and building functional, real-world applications.

## EDUCATION

|                                                                                                      |                                      |
|------------------------------------------------------------------------------------------------------|--------------------------------------|
| <b>Bachelor of Technology in Computer Science and Engineering</b> , Saintgits College of Engineering | Sep '22 — Apr '26<br>Kerala, India   |
| <b>Higher Secondary Education in Science Stream</b> , Durga Higher Secondary School                  | Jun '20 — Mar '22<br>Kasargod, India |
| <b>Secondary Education in Secondary Education</b> , Kendriya Vidyalaya No. 1 CPCRI                   | Jun '19 — Mar '20<br>Kasargod, India |

## EXPERIENCE

|                                                                                                                                                                                                                                                  |                                           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------|
| <b>Cybersecurity and AI Intern</b><br>KELTRON                                                                                                                                                                                                    | Aug '23 — Aug '23<br>Kochi, kerala, India |
| <ul style="list-style-type: none"><li>• Gained hands-on experience in cybersecurity and ML</li><li>• Developed Python scripts for preprocessing</li><li>• Worked with visualization and security tools</li></ul>                                 |                                           |
| <b>Frontend Development Intern</b><br>NeST Digital                                                                                                                                                                                               | Jun '24 — Jul '24<br>Kochi, kerala, India |
| <ul style="list-style-type: none"><li>• Designed and implemented responsive UI using Angular and TypeScript</li><li>• Collaborated in agile teams to develop scalable modules</li><li>• Integrated REST APIs and optimized performance</li></ul> |                                           |

## PROJECTS

|                                                                                                                                                                                                                                                                  |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Price Tracker Tool</b>                                                                                                                                                                                                                                        |
| <ul style="list-style-type: none"><li>• Enabled email alerts for price drops</li><li>• Improved tracking efficiency by 20%</li></ul>                                                                                                                             |
| <b>PotAlert: Spot.Alert.React</b>                                                                                                                                                                                                                                |
| <ul style="list-style-type: none"><li>• Developed AI-based pothole detection using YOLOv8, OpenCV, Firebase, React</li><li>• Captures pothole location, confidence score, and timestamp . Displays data on interactive dashboard using Google Maps API</li></ul> |

## CERTIFICATIONS

**Fundamentals of Cybersecurity**, NIT Calicut  
**Python Programming Add on course**  
**Machine Learning and Artificial Intelligence Online Course**

## LEADERSHIP & EXTRA-CURRICULAR ACTIVITIES

|                                                                                                                                             |
|---------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Event Head</b> , Nakshatra                                                                                                               |
| <ul style="list-style-type: none"><li>• Managed event planning and a 15+ member team</li><li>• Coordinated sponsors and execution</li></ul> |
| <b>Captain</b> , College Football Team                                                                                                      |
| <ul style="list-style-type: none"><li>• Represented college in inter-college tournaments</li></ul>                                          |

## SKILLS

**Languages** Python, Java, C, SQL  
**Web Technologies** Angular, HTML, CSS, REST APIs  
**Tools & Platforms** Git, VS Code, Linux, Selenium  
**Domains** Frontend Development, Cybersecurity, Machine Learning  
**Languages** Malayalam, English
